Free Cuba Head Says Dominican Commies in Hills

WASHINGTON, July 27. (UPI) — The Citizens Committee for a Free Cuba charged today that cadres forming the hard core of the rebel movement in the Dominican Republic are now infiltrating the countryside.

Paul Bethel, executive secretary of the committee, said this action does not mean the rebels have stopped supporting the rebel forces led by Colonel Francisco A. Caamaño Deno, but that they are taking up positions in the mountains and provincial areas to carry on the fight.

Bethel said the Castro-trained and supported communists are not willing to accept a peaceful solution, and are therefore preparing another type of assault on the Dominican Government, regardless of what the outcome of the present situation may be.

"These Castro-trained guerrillas have infiltrated not only the mountains of La Cueva district, but also the areas of Cotui, El Platanal, and La Cumbre, where the pro-Castro 14th of June movement surrendered to government troops in December of 1963," he added.
